Why Choose BION ?

Our Packaging
your grains and seeds

Raw Material

Sugar Cane

Sugar Mills

Bagasse Sheets

Bagasse Products

Compost

Biodegradation

Sugarcane is a non-food renewable resource, yielding new harvests annually. Sugarcane-bagasse is the name for the plant fiber that remains after sugar producers process the sugarcane stalk. We take the fibre and mold it into strong and attractive food packaging products. It is certified compostable and biodegradable.

Why Choose **Bagasse** over Plastic

Biodegradable

Easily disposed, nature friendly to use and can be re-produce to other things

Less Water

Minimal usage of water consumption

Faster Plant Production

Sugarcane takes only 1 year to mature compared to other plants which can take up to 30 years

Reusable but not Biodegradable

Easily to be produced but takes a lifetime to disposed

Contribute to Ocean Waste

Roughly 73.9m pounds of waste in the ocean

Contains Harmful Toxins

Dangerous that does not break down
